

I am anaesthetist from Brazil with a strong background in management, education, research, and clinical assistance. In the past few years, I had the opportunity to work in different fields of public and private Brazilian hospitals. I am a member of a group that works intending to bring safe anaesthesia and improve patient care. As a director of international affairs at São Paulo State Society of Anaesthesiologists, I was responsible for the signature of the memorandum of understanding between Brazil and ERAS Society with the goal of bringing quality and safety for the perioperative period together with the multidisciplinary team. Therefore, it will be an honour to be part of the Council of WFSA and help the Federation in the mission of improving patient care and access to safe anaesthesia and perioperative medicine.
