I am a long-time member of the DGAI executive committee. I am responsible for the organisation and design of the congress programs in the program committees of various congresses in Germany (DAC and HAI/ 4000 participants/ DiNK, 1200 participants). I am one of the founders of the Emergency Medicine Scientific Working Days, a flagship project since 2005 within the expert society. The national expert meeting for interdisciplinary resuscitation, held yearly in Bad Boll in Germany, has mainly been initiated by myself and has developed into an outstanding scientific meeting on resuscitation topics in Germany.

As Director of the Institute for Rescue and Emergency Medicine, belonging to the University Hospital Schleswig-Holstein, I am responsible for various local, regional and national conferences. Furthermore, I take the responsibility for and management of the German Resuscitation Registry which is one of the most important projects in the German emergency medicine. As project manager of EuReCa I am also highly integrated in the ERC and therefore responsible for many different organisational tasks. Based on these positions, I am also responsible for international meetings and conferences, the last one being the worldwide registry meeting in Singapore in October 2018.
