

I've been happy to be elected to the Council of the WFSA in 2016 and to participate since then in this exciting work of advocacy for global Anesthesia and particularly in Africa where so much remains to be done in order to reach the objectives of SDG3 and Universal Health Coverage (as defined by the WHO). This necessitates a joint effort of all the anesthesiologists of the African continent, organisation and exchange of experiences (as we have started to do in the Africa Regional Section) despite the many barriers including language. Representing and defending the complexity and diversity of the African context within our Federation is essential. I wish also to keep my commitment for presenting the views of the WFSA when meeting or discussing with our partners and decision-makers. I would like to keep high vigilance on the Anesthesia equipment issues in the continent and also the drugs shortages and contribute in appropriate training for the Anesthesia providers. I would like to introduce and promote e-Health tools to further improve the training and for sharing the expertise for better anesthesia care. I wish to be involved in this continuing, passionate and necessary job with my colleagues in the WFSA.
